About SSI ENGINEERING

SSI Engineering was established in the year 2019 in Gujarat, India. We are a manufacturer and supplier of road paver machines, screed paver machines, canal lining paver machines and a lot more.

We have a business legacy with roots in dam gate and road construction machinery manufacturing. Our strength lies in our on-field experience and understanding the customer's requirements and blending them with our knowledge for optimal and consistent output.

These machines are useful for constructing highways, inter-state, intra-state, town, city and village roads. We avail multiple models to choose from according to work requirements with options to control slope and grade electronically or manually. We are providing our products with the brand name SSI Engineering.

We specialize ourselves in designing machines for easy operation, maintenance, and economic performance. All the machines are designed giving priority to performance, maintenance, good machine life, and great value for money along with decade-long experience and on-site reports.

Our Vision

To be the world's premier construction equipment manufacturing company ensuring high-quality products and best customer support, and impetus sustainable road developments in India and abroad.

Our Mission

To quantify our market presence and build healthy customer relationships by manufacturing high-performance paver machines, offering reliable services at fair prices and ensuring a growth-conducive work culture.
